

## HQHVSN Surgeon and/or Preventive Care Veterinarian: Emancipet

Location: Central Austin Clinic, East Austin Clinic, Killeen Clinic, Mobile Clinic, Pflugerville Clinic, Philadelphia

### Who We Need

We are seeking a veterinarian who will serve as a HQHVSN Surgeon and/or Preventive Care Veterinarian at our Austin area clinics. Our HQHVSN surgeons are responsible for the comfort and safety of all surgical patients in their care at Emancipet and for performing high-volume spay/neuter surgery in accordance with our high quality standards and SOPs. Our Preventive Care Veterinarians provide well pet services to our patients. All Emancipet Veterinarians are responsible for sharing medical information with clients with compassion and empathy and developing professional, friendly, and mutually-beneficial relationships with local veterinarians, promoting Emancipet and our mission within the veterinary community.

Our ideal Veterinarian has a deep, personal passion for our mission, is committed to serving the people and pets of the Central Texas area, and is an outstanding communicator. Candidates must have, at a minimum, a DVM and be eligible to obtain a license to practice veterinary medicine in Texas and eligible to obtain a DEA license. At least one year of experience as a high volume spay/neuter surgeon (25-30 surgeries per five-hour shift) is preferred. Training is available, however, for candidates with a strong desire and aptitude to become successful high volume surgeons and who demonstrate an outstanding culture fit. Working exclusively in preventive care is also a possibility. Our days and hours of operation reflect the needs of our clients, so Saturdays and some early evenings will be required.

### Is It You?

There's a chance you may be our ideal veterinarian if you meet the description above, and if:

- Even though you often find yourself teaching others, you live to learn more and geek out on JAVMA articles
- After a long day of helping 50+ families and their pets, you still have the energy to hit the town with your friends
- You have a bunch of gross pictures on your phone (of surgeries!) that you can only share with other veterinarians
- You don't take life (or yourself) too seriously and are quick to laugh!
- You would love to be part of a team that has fun every day, *and* considers medical excellence is a bottom line
